Subject: Glock Pistol Maintenance & Price Comparison

Some of the largest police departments in the U.S. have successfully deployed the GLOCK pistol for over twenty five years. These agencies strive to enhance officer safety through a comprehensive training program that includes frequent live fire exercises. The pistols will display normal wear after extended use and may require periodic parts replacement to ensure reliable function as duty weapons. The following parts may display normal wear and require replacement during the inspection process. The price is provided to assist in determining the relative cost of maintaining pistols with extensive service.

Part	Cost	Interval
Recoil spring assembly (.40 Cal 3,000 Rounds Max rounds) (.45ACP/9mm/.357 Auto 5,000 Rounds Max before changing)	5.00	3,000 to 5,000 rounds
Recoil spring assembly (Sub-Compacts)	12.00	
Slide stop lever & spring	5.00	Function Test
Extractor (Upgrade to Loaded Chamber Indicator)	13.00	As needed
Trigger with trigger Bar	10.00	None Determined
Trigger spring	1.00	As needed
Firing pin	30.00	Function Test
Firing pin Safety & Spring	4.00	w/ Firing Pin
Firing pin Spring	2.00	Function Test
Magazine spring	4.00	3-5 years
Magazine follower	2.00	As needed
Magazine insert	2.00	As needed
Night Sights	57.00	8 Year Warranty
New Magazine (Standard)	21.00	1 Year Warranty
New Magazine (Sub-Compacts)	30.00	1 year Warranty

GLOCK pistols are manufactured with the highest quality and most durable components available. Some components may wear faster than others and a comprehensive inspection process is recommended to identify worn parts. As we discussed, **the replacement of critical parts may approach the replacement cost of the existing pistols.**

The replacement of three magazines, the extractor, firing pin and firing pin safety, recoil spring assembly and Glock Night Sights will cost approximately **\$174.00** per pistol. This cost may be contrasted with the replacement cost of **\$409** for one standard frame Glock pistol, less trade value offered by one of our Glock LE Distributors. If a distributor allows **\$260.00** trade for department trades, the cost of **\$149.00** each (agency cost) for a new GLOCK pistol is a savings of \$21 per pistol. This scenario is dependent on value of trade-ins. ***Trade-ins may be higher than \$260.00 also, depending on the market value and/or the distributor you choose at the time of the purchase.***

If you have any questions, please feel free to call or e-mail me at anytime regarding the above mentioned prices.

Sincerely,

Joel Hodges
