Customer Proposal & Specifications

Company: City of New Port Richey
Attention: Bill Gregoire

Tank:

Model: EAM 2000 steel water tank. One compartment 2000 gallon capacity.

Tank Construction: Water tank will be constructed of carbon steel with a 3/16" floor and the remaining areas of the tank will be 10 gauge. All heads and baffles will be 8 gauge. All heads will be dished and flanged.

Compartments: One compartment tank

Tank Sills: Long sills to be 6"x4"x3/8" carbon steel with cross members installed at all heads and baffles.

Manway: One Betts 16" Tiona manhole cover with a 10" latching cover.

Fenders: Fenders to be manufactured from .125 aluminum

Ladder: One ladder to be installed on rear head with lower cable step off bumper

Outlets: One 4" outlet with a vortex breaker installed in lower center of tank

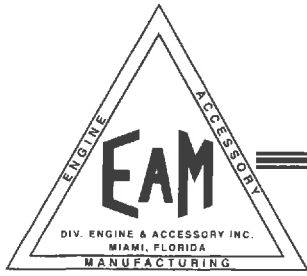

Inlets: One 3" combination overflow and hydrant fill with air space. Cam lock and dust cap installed.

Sight Tubes: One sight capacity tube is installed in the front left corner and one in the left rear corner.

Bumper: One DOT approved rear bumper

Lighting: All lighting is to be done in Truck Lite modules with vapor proof wiring and junction boxes.

Mounting: Tank to conform to DOT mounting procedures. Composite material mount boards installed between chassis frame and tank sill. Front of tank is spring loaded to allow for flex of the frame behind the cab.

Engine & Accessory, Inc.

Paint: Tank is to be completely sandblasted inside and epoxy coated. Outside of the tank to be sandblasted, primed, and painted one color

Decals: One large water decals will be installed on each side of tank.

PUMPING SYSTEM:

Pump: One Berkley BZ3RM centrifugal pump. One heavy duty pump mount bracket mounted off of frame. Pump will supply front, side and rear spray heads along with the hose reel and water monitor

Drive System: Pump to be driven with a hot shift power take off system with a 1310 series PTO shaft. PTO control to engage pump will be located inside the cab.

Control Panel: One aluminum control panel to be installed in cab.

Tank Valve: One 4" air operated tank to pump valve with control in cab.

Spray Heads: Two Diamond spray heads mounted in rear of tank between bumper and tank. Two Diamond spray heads mounted in front of unit and one spray head mounted on each side of the unit. All controls to be mounted inside the cab on control panel with separate air switches for each spray head.

Water Monitor: One Elkhart Sidewinder water monitor mounted on the top front of tank with joy stick installed inside the cab.

Hose Reel: One Hannay manual rewind hose reel mounted on the driver's side of the frame with 50' of 1" hose and lexan nozzle.

Strobe light: One rear mounted amber strobe light to be installed off of top of tank with switch in cab

Paint: All brackets to be painted black.

Installation: Complete assembly of tank and pumping system onto chassis, all system plumbing hoses, pipe fittings, mounting kit, mud flaps, and anti-sail brackets. Electrical wiring to be enclosed in protected loom. Installation to include pump test.

Manuals: One set of manuals to be supplied with unit.

Engine & Accessory, Inc.

CHASSIS

To be supplied by customer

RECAP:

NEW TANK AND PUMPING SYSTEM \$48,345.00
CHASSIS
