New Port Richey, FL 34652

Officer Brett Schambach,

Please be advised that Laser Technology, Inc. is the sole manufacturer and distributor of the **MapStar<sup>®</sup> TruAngle**. More than just an electronic encoder, the **MapStar<sup>®</sup> TruAngle** brings a host of new advances to portable angular measurements. Some of the **MapStar<sup>®</sup> TruAngle** features are:

- Integrates with LTI lasers to generate 3D measurements
- Fiberglass filled polycarbonate body providing a lightweight, yet rugged frame
- 8 hours continuous use with 2 AA batteries; indicates battery life at all times
- Not susceptible to magnetic interference
- Custom backlit display provides readability in light and dark conditions
- Allows for easy calibration of sensors with its on-board routines
- Audio and visual indicators assure confidence of positive angle acquisition.
- RS232 serial output gives you the option to store data externally; data is transferred either automatically or by a manual key press.

If I can provide you with additional information on this matter, please feel free to contact me.

Sincerely,

Vinny Alvino  
Product Manager – Traffic Safety  
Laser Technology, Inc.
