Summary of Construction Activities

The 2019/20-2023/24 Capital Improvement Program (CIP) reflects the City Council's desire to complete a number of projects anticipated for several years. These include:

1. The annual resurfacing and reconstruction of streets in accordance with the city approved Pavement Management Plan;
2. The design and construction of a multi-use path on Grand Blvd. from Marine Pkwy to Central Ave. Downtown ;
3. The establishment of a new fire station and the upgrade of an existing fire station;
4. The continuation of various park improvements including James E. Grey Preserve
5. Facility improvements at City Hall and the Library;
6. Facility replacement of the Fleet and Utility Purchasing Warehouse;
7. The design and construction of drainage improvements to the City's Stormwater Collection System;
8. The design for future replacement of wastewater pump and control components at various lift stations including SCADA system upgrades;
9. The design for future rehabilitation of a new sanitary sewer force mains which have declined in condition and are beyond their serviceable life;
10. The continued replacement and expansion of water mains and distribution system components;
11. The design and construction of reclaimed water main system where practical.

These construction initiatives reflect the City Council's progressive approach to enhance municipal services to the residents and businesses in the City New Port Richey as identified in the City's Strategic Plan. In addition, the selected projects will serve to achieve one or more of the following key objectives:

- to provide quality of life elements to the residents of the City;
- to provide incentives for the private reinvestment needed in the City's residential and commercial neighborhoods;
- to improve the capability of the City's utility system to meet future demands and to provide the infrastructure for continued redevelopment of the City;
- to improve and provide a suitable transportation network that meets the current demands and is expandable to meet future demands;

Summary of Funding Sources

As in the most recent fiscal year, the City's plans for the financing of its Capital Improvement Program (CIP) during the upcoming fiscal year will be reliant upon the use of the following major city funds: the Stormwater Utility Fund (002), the Capital Projects Fund (301) (Penny for Pasco Tax dollars), the Water and Sewer Revenue Fund (405), the Redevelopment Fund/CRA (603), the Street Improvement Fund (701), and Federal and State grants. In addition, the CIP includes the use of financing to support projects in the Capital Projects Fund, and the Redevelopment Fund. Projects are grouped according to their primary fund. Some capital improvement projects include elements for which more than one fund support. Each project is assigned to its principal funding source and the details of that project will include references to those other sources contributing funds.

The City will continue to seek additional grant opportunities to leverage its investments.

Summary of Flood Control/Water Quality Projects

The City's current Stormwater Master Plan identifies both flood control and water quality improvements in the City's future. The Utility's Master Plan identifies projects that meet the Federal Government's 1972 Clean Water Act, administered through the State of Florida and identified as the National Pollutant Discharge Elimination System Permit and its required mandates. The pace with which these identified projects are addressed will be a function of the availability of grant funds and the amount of the Stormwater Utility annual fee assessed by the City to all property owners in the City.

Misc. Flood Control/Water Quality Projects

These projects include the construction of new stormwater systems or the rehabilitation of existing stormwater systems to correct historical flood prone areas and improve water quality. These projects also include needed upgrades identified for the existing stormwater systems during other city projects such as: Street Improvements, Neighborhood Improvements, and Utility System Projects.

Costs:	2019-2020	Future Years
<i>Site Acquisition:</i>	\$ -	\$ -
<i>Engineering:</i>	\$ -	\$ -
<i>Construction:</i>	\$ 200,000	\$ 800,000
Total:	\$ 200,000	\$ 800,000

Sources of Funding:

- Stormwater Utility funds primarily, with possible federal and state grants administered through the South West Florida Water Management District and/or Florida Department of Environmental Protection.

Schedule:

Site acquisition: Not applicable

Engineering: Not applicable

Construction: 2019 - 2024

Notes: Associated Projects

- Orange Lake Improvements
- Grand Blvd. & Homecrest Outfall Drainage Upgrades
- Madison Street Streetscape Multi-Use Path

2018 Beach St. Stormwater Improvements

This project is included in the 2013 Stormwater Master Plan. The project's purpose is to provide for intersection drainage improvements with the installation of stormwater inlet structures, the replacement of the existing 24" and 30" pipes, and the up sizing to 36" storm system pipe from the intersection of Beach St. and High St. to the river outfall pipe located on Executive Dr.

Summary of Capital Improvement Plan Projects

The Capital Improvement Plan identifies allocation categories designated for the Penny for Pasco Tax Dollars.

2019/2020 The Meadows Dog Park Upgrades

This project includes facility upgrades to the Meadows Dog Park located south of Cecelia Drive and west of Madison Street. These upgrades include the removal and replacement of the existing playground, replacement of the existing shelter, bathroom rehabilitation, trail/path improvements, removal and replacement of the existing fence, the installation of sod, parking lot, and signage improvements.

Notes:

2020 HVAC Control System & Server Upgrades

A portion of this project was included in the 2017 Volt Air Consulting Engineers HVAC Deficiency Analysis for the City’s Recreation and Aquatic Center Expansion project. The control system and server and the kitchen plenum were listed as item three and four for the completion of phases listed. The control system will provide point-to-point controls validation, functionality, and sequence of control, as well as the ability to connect to the City’s HVAC communication system. The kitchen plenum element of this project will provide a separate A/C supply to minimize the amount of unconditioned air that currently gets mixed into the existing kitchen area and main lobby area of the recreation center. Finally, this project includes the replacement of existing master controllers, data base and graphics to include email alarming set point notifications, Administration, Operator, and View Only functions, automated weekly, holiday, and seasonal service operations, and the removal and replacement Variable Air Volume (VAV) boxes at the Public Works Operations Center and Police Station.

Notes:

City Hall Facility Renovations

This is a storm hardening/facility upgrade project that began in the City's 2017/2018 fiscal year and is expected to be ongoing over the next five years, due to the age of the facility. This phase includes the installation of new sliding entry doors, restroom upgrades, and the removal of glass block and the installation of a solid glass partition located in the main lobby. Future years would include impact resistant windows and the enclosure of the existing open walkway connecting the Library to City Hall.

Notes:

Marine Parkway Pedestrian Bridge

This project includes the construction of a shared use (pedestrian/bicycle) bridge and ramp system over US Hwy 19 at Marine Parkway to accumulate continuity of the recent shared use pathway on the south side of Marine Pkwy to Grand Blvd. and the existing shared use path on the west side of US Hwy 19. The portion of the bridge spanning over US Hwy 19 utilizes a simple span prefabricated steel through truss. The proposed east and west switchback ramps will utilize a cast-in-place reinforced concrete construction and conform to the Americans with Disabilities Act criteria for grades. Phase 1 of the project includes the acquisition of right of way needed to construct the shared use bridge and ramp system. Future phases include the design, permitting, and construction.

Costs:	2019-2020	Future Years

Summary of Water, Sewer, & Reclaimed Utility Projects

Water main extensions are planned to improve fire-fighting capabilities and to improve service pressures and water quality in portions of the City's distribution grid and utility service area. Construction of force mains are proposed in order that deteriorated force mains in the system can be abandoned. Additional construction for lift station replacements and/or rehabilitations is planned to replace equipment that is beyond its serviceable life. In addition to the planned lift station projects, the City will also televise portions of the existing collection system and re-line or repair sewer mains wherever needed to reduce the infiltration of groundwater into the system.

Staff will work with Southwest Florida Water Management District to obtain Grant funding where possible to assist with the construction of residential reclaimed systems as identified in the adopted Reclaimed Water Master Plan Document.

The City is also prepared to expand its sanitary sewer collection system to areas located within the City's defined utility service area to provide service to properties now served by on-site septic systems. Projects located within close proximity to the Pithlachascotee River and other surface waters would receive priority consideration because of the associated beneficial impact on the environment.

Fleet and Utility Purchasing Warehouse - Building Construction, Material and Equipment Storage Improvements

This project consists of the design and construction of a new building and the conversion of the existing 1973 structure into an area for equipment and material storage.

Construction: 2019 - 2024

Notes:

2019 Oranewood Lakes Water System Improvements

The Oranewood Lakes Service, Inc. (OWL) was a private utility company that supplied drinking water and sanitary sewer services for several communities east of Rowan Rd., south of Massachusetts Ave., west of Osteen Rd., and north of Knight Dr. until the City acquired the system in 2019. This project description calls out for the upgrade of the existing inter-connect and upsizing of the potable water transmission supply line from the City's existing system to the OWL system.

Notes:

2018/2019 Sewer Utility System Improvements

This project includes the design and construction of a new sanitary sewer force mains in areas of the existing system which are beyond their serviceable life and prone to rupture. Construction of the New Force Mains will allow for the abandonment of the existing force mains located in easements and right-of-ways. This project also includes the replacement of wastewater pump components, structures and control logic at various lift stations in the City's System. They include: The removal and replacement of the lift station located at Lafayette St. and Louisiana Ave., Upsizing of the lift station located at Frances Ave. Park, the relocation of the six inch force main along Louisiana Ave. from Lafayette St. to Grand Blvd. to Georgia Ave., and the installation of a 10" force main along Georgia Ave. from Grand Blvd. to Frances Ave.

Site acquisition: Not applicable

Engineering: 2019 - 2024

Construction: 2019 - 2024

Notes:

2018 Orangewood Lakes Force-Main Interconnect Project

This project includes the transfer of sanitary sewer flows from the existing Orangewood Lakes system into the City's existing 12" force main located on Massachusetts Ave. east of Rowan Rd. This transfer of flows will require the installation of a new lift station on the N.E. corner of the existing Orangewood Lakes Wastewater Treatment plant and the installation of approximately 1.3 miles of six (6) inch diameter force main along Osteen Rd. North.

Summary of Redevelopment Fund Projects

The Community Redevelopment Association (CRA) updated its redevelopment plan and has developed a strategy to include capital improvements that would target specific needs critical to the City's economic growth.

Building Improvements - Hacienda Hotel

The project is to link the Hacienda Hotel to Sims Park and provide for natural entry points between the two properties. Specifically, the funding will be used to establish perimeter treatments on the north and west sides of the property once the fence that currently divides the properties has been removed. It is expected that the treatments will consist of both hardscape and landscape elements.

Engineering: Not applicable

Construction: 2019 - 2020

Notes:

Neighborhood Improvements - In-Fill Housing

The project funding will be used to upgrade single-family properties acquired by the City. The purpose of the upgrades are to prepare the properties so that they may be offered for sale and placed back on the tax rolls. The funding will also be used to purchase tax lien properties and demolish substandard housing.

Costs:	2019-2020	Future Years

Schedule:

Site acquisition: Not applicable

Engineering: Not applicable

Construction: 2019 - 2024

Notes:

Neighborhood Revitalization Program

The funding will be used to finance household improvements to homeowners on a low-interest loan basis. The type of improvements that will be eligible under the program are intended to improve curb appeal and include: roofs, windows, doors, porches, painting, siding, lighting, irrigation, and landscape. The loans will be repayable to the City at any time, but no later than at the time of title transfer.

Notes:

Parking Lot Improvements - Nebraska Ave Parking Lot

This project will include the redesign and construction improvement to the existing city owned parking lot, south of Nebraska Ave. behind the Suncoast Richey Theater, combined with the newly acquired Pasco County parking lot, located adjacent to the city-owned parking lot. Improvements include hardscape, landscape, irrigation system, LED lighting upgrades, and restriping.

Notes:

Streetscape Enhancements

The project involves an assessment of the condition of the City's streetscape elements in the downtown area. Once an assessment has been conducted, a plan will be developed to tend to necessary maintenance and improvement items. In addition, a master plan which provides for the selection and siting of the following features: bike racks, banners, planters and shade structures will be developed.

Notes:

Railroad Square Improvements

This project will review the improvements which were originally installed in 2011 and provide for needed updates and enhancements. The following elements of the plan will be reviewed: pedestrian walkways, landscape, lighting and parking. The review will be in the context of current conditions and uses of the property. Once having reviewed the effectiveness of the various plan elements, a project to implement the proposed advances will be initiated and implemented.

Notes:

Neighborhood Alley Improvements

The project involves implementing various improvements in the City's 5.2 miles of alleyways. An existing condition analysis was conducted by Genesis Halff in June of 2019. The inventory, along with resident input, will serve as the basis for decisions related to the type of improvements that are warranted. The funding will then be used to implement the identified improvements.

Notes:

Bicycle Trail Improvements

The City's parks and recreation system is integral to the quality of life for city residents. Bicycle trails are an important component of a recreational system. Additional bicycle and pedestrian connectivity was identified as a community need in the 2017 Parks and Recreation Master Plan. The proposed project is to identify gaps in a bicycle trail plan that links the city to other bicycle trails. Once the gaps are identified, a plan will be developed to address the gaps in the system.

Summary of Street Improvement Fund Projects

The 2019 - 2024 Capital Improvement Program includes funding for various street improvement projects. Street projects are identified in the 2015 Roadway Needs Assessment Report and include resurfacing and/or reconstruction of streets in various locations throughout the City. The funding is found in Fund 701, the Street Improvement Fund, and incorporates the use of local option gas tax dollars, Penny for Pasco tax dollars, solid waste franchise fees, special assessments, and general fund revenue.

The 2019 - 2024 Capital Improvement Program also includes funding for annual roadway striping projects. The projects include the replacement of Thermal Plastic Pavement Markings on streets throughout the City. In addition, upgrades to traffic control signage and traffic calming devices are included.

2017/2018 Street Improvement Project

This project includes the design, resurfacing, and reconstruction, where needed, of streets and sidewalks throughout the City. This project will focus on the City’s collector roads such as Gulf Drive (Madison St. to US Hwy 19), Massachusetts Ave. (Grand Blvd. to Anderson St.) and residential streets, such as Wyoming Ave., Montana Ave., Tennessee Ave., Azalea Dr., Richey Dr. Char Ln., and a portion of Indiana Ave. (Grand Blvd. to Washington St.)
