DESCRIPTION

Chrome lined barrel and chamber. Features A2 bird cage style suppressor. A3 type removable carry handle features 1 MOA elevation and 1/2 MOA windage adjustments. Picatinny type rail base. Flat-top upper receiver. Non-reflective mil spec hard anodized aluminum receiver. Six-position telescopic. Shipped with 30 round magazine, chamber flag and operator's manual.

One of our ALL TIME BEST Carbine models, the M4 Type features a distinctive Military Barrel Profile and Six Position Telestock - great for 3 Gun Match Shooting, Home Defense and Law Enforcement use.

The Bushmaster A2 & A3 Type Patrolman's Carbines are modeled after our M4 Type Carbines, but with additional barrel length to make them legal for sale to individual officers (semi-automatic configuration with 16" barrel).

The 5.56mm/.223 Rem. caliber 16" barrel is chrome lined in both bore and chamber for long wear life and ease of maintenance. For control of muzzle flash and muzzle rise in rapid fire, a "birdcage" type suppressor is factory installed. A mil. spec. manganese phosphate outer coating insures protection against corrosion or rust on the barrel and all critical steel parts of the weapon.

Forged, lightweight 7075T6 aircraft quality aluminum receivers are designed for simplicity of maintenance and reliability of operation and they incorporate all M16A2 design improvements including cartridge case deflector, bolt catch assembly and raised ribs for protection against accidental magazine release. A six position telescoping buttstock offers light weight, carrying ease and quick handling.

The telestock, pistol grip and two piece handguards are all molded of strong black thermoset composite material. The handguards are internally
